ENHANCING SKILL EMPOWERING YOUTH

Karnataka has population of 6.25 crores where 55%(3.44 crores) is the youth. This demographic advantage presents us with a window of opportunity for the next 25 years by giving the state a developmental edge and the potential to leverage as a global leader, provided this large youth population is channelized, skilled and equipped adequately.

The Government of Karnataka, led by honourable Chief Minister, set up the Department of skill Development, Entrepreneurship and Livelihood (SDEL) in 2016 to enable the youth to obtain imperative skills for employment, and to promote sustained livelihood. Simultaneously, industry's need for skilled manpower will be satisfactory met resulting in enhanced productivity and growth in all the three sectors of economy.

SPECIAL INITIATIVES

Generating awareness & creating aspiration for skill

Improving training infrastructure

Building trainer's Capacity

Enhancing training quality

Utilising apprenticeship potential

Up-skilling, re-skilling & recognition of prior learning (RPL)

Providing Career guidance and placement

Generating overseas employment opportunity

"CMKKY"

➤ Frequently asked questions (FAQ)

What is Kaushalaya Karnataka Mission (KKM) ?

Kaushalaya Karnataka Mission has been formed to focus on providing skills to enhance employability of the youth through skill development. KKM is responsible for co-ordination of all skill development efforts across Karnataka to alleviate the disconnect between demand and supply of skilled manpower, building the vocational and technical training framework, skill up-gradation, building of new skills, and innovative thinking not only for existing jobs but also jobs that are to be created. KKM aims to efficiently impart skills while upholding best practices in the endeavour to achieve the vision of a 'Skilled Karnataka'.

What are the features of Kaushalkar.com?

Kaushalkar.com is a single window IT application which provides e-learning, registration of trainees, training provider, training centre and the accreditation, affiliation and continuous monitoring of the training Centres in the Skill Ecosystem. It also intends to address the important issues like evaluating skill providers in an objective manner, fostering excellence in Training Centres, enabling trainees to make informed choices with regard to Training Centres etc.

Authorised
Training Partner

"CMKKY"

- ❖ Centre for Professional Excellence provides various certification programmes

Gopalan Skill Academy takes keen interest in bringing practical exposure to candidates in order to enable them to learn cross-cultural management practices, comparative analysis of business phenomenon and opportunities, not only within the city, but also across the cultures & practices internationally.

➤Evaluation of Training Activities

The Centre's training activities come in different types. They can be linked to a project. They can be tailor-made to the requirements of specific organizations. They can be standard courses developed by the Centre in line with the NSQF mandate and the wider NSDC mandate. In all of these contexts, the Academies training is meant to build capacity in individuals and, through them, create a lasting effect on organizations and on society as a whole. It is meant to enhance the knowledge, skills and attitudes of the individual participants, and thus their performance once back in their jobs. The systematic evaluation of its training activities is an essential component of the academies learning approach.

Authorised
Training Partner

Participant satisfaction

The end-of-activity questionnaire provides feedback on participants' satisfaction with the content, methods and services of an activity they have just completed. The Centre processes the information to identify trends, strengths and areas for improvement in its programmes and services.

Assessment of learning

The academies trainers use a variety of methods to determine the extent to which participants have assimilated new knowledge and mastered new skills as a result of a training activity. The methods we favour are self-assessment, often both before and after a training session, and multiple-choice questionnaires. On longer courses, we administer more formal tests and require participants to write essays or to present the results of their work. Most activities guide their participants to develop action plans to implement when they return to their own organizations. Presenting these action plans at the end of the workshop gives both participants and trainers the opportunity to assess what learning has taken place.

Authorised
Training Partner

Impact evaluation

Evaluating the effects of training on the participant's own performance, on the performance of the participant's organization, and on the participant's professional sector (i.e. going beyond the assessment of learning) demands a specific approach to specific scenarios. We use follow-up seminars, surveys and interviews to investigate the impact of individual activities, whereas we prefer thematic reviews for more comprehensive evaluation. A "thematic review" evaluates the impact of a set of activities the academy has been on its vision and mission on the same subject for the same type of target audience. It covers all the participants in the courses involved. It uses questionnaires, interviews and other tools. The aim is to provide substantial feed-back on: a) the adequacy of the training and any improvements that are desirable for future courses; and b) the extent to which the participants have been able to use the knowledge they acquired during the course in their own institutions, in conducting training or in any other way in civil society.

Authorised
Training Partner

Project evaluation

Whenever the Centre runs a long-term training project, it carries out evaluations before, during or after each activity.

Learning Resources

The Mobile Learning Toolkit

‘Mobile’ in the ‘Mobile Learning Toolkit’ goes beyond the use of ‘mobile’ phones, and explores fundamentally how we can make learning accessible ‘anytime’ and ‘anywhere’ beyond the physical borders of a training room. The toolkit will be updated annually with new stories as the mobile learning story is evolving and one we started just a few days ago.

Mobile Engagement with Members – A toolkit for Business Managers @ GSA

The GSA’s Programme for Employers’ Activities has adapted the Mobile Learning Toolkit to help Board members, executives and managers of Business Member Unit (BMU) make use of mobile technologies to engage more effectively with their members: *Mobile Engagement with Members – A toolkit for BMU’s*

Message from President, Gopalan Foundation

“We take pride in being the Nation's Skilling Partner...”

The world is changing, and India is renascent. An already recognized world player, the vision of our nation being rightfully termed as a 'Superpower' is very much in sight. The road ahead for us, though clear, is not yet paved. There exist challenges, which we will have to overcome, to finally stand on the podium and claim greatness as ours.

Our greatest strength is also our biggest weakness. The dichotomy of having a large young workforce and yet our industries struggling to find suitable talent is much too obvious. This lacuna stretches across skill and education levels. It could be our biggest challenge yet.

This is the space where our skill academy steps in. Already an established and leading player in the Education scenario, Gopalan Skill Academy will take giant strides in the skill building business through our multi-pronged initiatives.

We have proposed partnership under the Schemes of GOI & GOK. Beyond the Private tie up, We also plan to work with a host of agencies on a variety of initiatives across the industry. A majority of these initiatives target youth from under-served sections of society and work towards mobilizing, training, employing and hence empowering them with a chance towards a brighter future.

Besides, our regular academy colleges; now through our skill development centre we intend to provide students with an opportunity to study vocational courses which comprise of deep integration modules within the industry of their choice. A certification of being job-ready along with a regular course degree enables the students to hit the ground running on the first day of their job.

Apart from our newer initiatives, we are increasing the foot-print of Gopalan Group in the space that has long been our forte- Education sector. We take immense pride in being the skilling partner to the nation, its people and its industry. A partnership that could just be integral to India's successes in the time to come.

- GOPALAN C President, GOPALAN FOUNDATION

Message : Kiran Viswanath, Registrar

Quality Human Resource is the cutting edge of this modern globalization. Gopalan Skill Academy in Bangalore presents professional training facilities and faculties for developing skilled experts - manpower. We always feel the social responsibility and took a step ahead to develop skilled work force for our country. We assure, with Gopalan Foundation we have been able to build brilliant Vocational training platform in Bengaluru "Gopalan Skill Academy". I also believe Gopalan Group with its other resources will continue to play a distinct role for developing skilled manpower. I am wishing our management a continuous success.

Message : Lt.(Hony) S.U.Rathod, Principal

I am delighted to be a part of Gopalan Skill Academy. There was a need for multidisciplinary skills development centre offering high-quality cost-effective skills trainings, driven by the demands of the industry. This is an exemplary work where our Gopalan Foundation, corporate, development and Government sectors have come together for a common cause. I am committed to serve this academy, We will offer competent courses in specific sectors for the local people. I congratulate Gopalan Skill Academy and wish it a grand success.

Demand for packaging of various types has continued to rise in Karnataka. The upswing in demand is driven by high growth in volume sales of FMCG, kick started by launch of several new consumer goods such as soft drinks, alcoholic drinks, dairy, home care products etc and the increase in volume sales of packaged goods.

Growth in organised and modern retailing channels such as supermarkets and hypermarkets has driven the shift towards packaged goods. Modern retail outlets are better equipped to showcase packaged products and has made packaging a very important marketing tool and has contributed to the exponential growth of the packaging industry. At GIM Expo there will be packaging solutions to every type of product and every kind of packaging will be showcased.

The Indian processed food industry is in an exciting stage of growth and development. Karnataka boasts of specific supply strengths, giving the state a comparative advantage to become a leading food processing hub of the country. With 10 Agro-Climatic Zones and land topography highly suitable for agriculture, Karnataka is one of the most agriculturally diverse States in India.

Consequently, Karnataka is the largest producer of ragi, sunflower, tomato, coffee, arecanut, spices, aromatic and medicinal plants and the second largest producer of maize, grapes, pomegranate and onion. It has a wealth of livestock and marine resources that augur well for processing of dairy, meat, fish and shrimp.
